

FAKE NEWS IS ALIVE AND WELL IN OUR HOME!

Fake news is a neologism often used to refer to fabricated news. This type of news, found in traditional news, social media, fake news websites, or Bob's brain has no basis in fact, but is presented as being factually accurate.

Fake News hot off the presses:

- Bob reported today that the Chinese Space Station crashed in the ocean near a ship (not an island) named the Tahiti.
- Bob saw a program called "Adopt 8" on TV (it's about adoption and is on channel 8). Bob says that it's about all about people adopting 8 kids.
- Bob worries that Kyle and Elizabeth won't be running in half-amazons (not half marathons) anymore with all these issues that Amazon is having.

These news recaps make be fake but they surely make me smile more than the regular news does. So keep 'em coming Bob!

Love you honey.
